DETAILED ACTION

Response to Arguments

1. Last OA is hereby incorporated by reference.
2. Applicant's arguments filed 5/15/06 have been fully considered but they are not persuasive.

Applicant argues that El-Rafie does not teach the storage device stores incoming packets for later retransmission.

Examiner disagrees.

This limitation is not claimed. What is claim is "signals are stored as files in said integrated satellite receiver and router for lather further transmission,". It is clear that the Terminal Device (Proxy server) is a integrated satellite receiver and router. The terminal device 2 receives signals from Internet host 5 via satellite link 18 to be later transmitted to the terminals in corporate LAN 25 (See col. 8, lines 13-25). The IP packets from the Internet host 5 are web page files (See col. 10, lines 44-63).

Applicant further argues that El-Rafie does not teach the use of an Ethernet transceiver at the satellite receiver.

Examiner disagrees.

The Proxy server 2 of fig. 3 includes a LAN interface 11. This is the Ethernet transceiver.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
